ABOUT PLIESE

Developed by special needs educators, PLIESE encompasses a total learning approach.

PLIESE is an integrated learning programme that recognises an **individual's strengths, interests, wants and needs**.

PLIESE not only **benefits the child**, but also the teacher and the rest of the class, as well as the young person's parents, their community engagement and social well being.

PLIESE has been used as an effective engagement tool linking disengaged learners to task-oriented and interest-based projects and enriching **gifted and talented learner** needs.

PLIESE project-based **learning and mentoring** enhances and accelerates positive social outcomes and links to the community.
